YOUNG HACKS ACADEMY

We're more than a tech camp. Offering programs to students in grades 5-9, Young Hacks Academy uses technology to develop real-world leadership skills. A blend of computer science, creative problem-solving, and teamwork, YHA teaches kids to create cool video games and digital media about big challenges impacting the world we live in. No programming experience is required. For more information, visit younghacks.com.

TRANSFERABLE LIFE SKILLS

With a focus on personal development, our programs build confidence and initiate exciting ideas for making a difference. Through a learning-by-designing approach, YHA prepares students to apply social readiness and technical ingenuity over a week of fun, collaborative challenges.

CODING FOR A CAUSE

YHA students gain an awareness of important local and global issues. Every project connects to the **U.N. Sustainable Development Goals** for 2030. By exploring these topics, your child will come to better understand the problems our planet faces and will be tasked to think critically about how to solve them.

OUTDOOR FUN

As serious as we are about exploring tech, YHA is also committed to having fun away from the screen, moving campers outside each day for unplugged games like treasure hunts, riddle relays, and other team-building activities.

A COMMUNITY LIKE NO OTHER

Students create a community where a sense of belonging and shared enthusiasm fuels a meaningful exploration of computer science and the digital arts. A week at YHA provides your child with the launching pad to become a successful contributor in the 21st century.

"YHA has found a new way to inspire our children and demonstrate the opportunities that are available in their future. My son loved his week and looks forward to doing it again!"

– Michael, Hanover, NH

"My son was excited every morning to go to camp and excited every afternoon to tell us about the activities. Each evening he avidly worked to research and improve his projects by his own choice and drive. Thank you YHA for a priceless week!"

– Shara, Gorham, ME
